## DETAILED ACTION

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest the claimed sensor, in particular the *combination of* a pressure sensor, having a housing, a housing interior that contains a sensor element, electrical connecting elements that are routed from the outside, through a housing part and into the housing interior and have connecting segments, which protrude into the housing interior on an inside of the housing part at respective entry points and are electrically connected directly or indirectly to the sensor element, and having a protective covering that covers the connecting segments and the sensor element, wherein a sealing material is applied onto the connecting segments, at least in the region of the entry point of the connecting segments into the housing interior and the part of the inside of the housing part encompassing the entry point, and the covering is applied onto the sealing material and the connecting segments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

The prior art made of record on the attached PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.
